Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 15, 30 and 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 15, there is no antecedent basis for the "means of control of the deformation of the base".

In claim 30, there is no antecedent basis for "said deformation".

In claim 31, it is unclear what is being claimed. Is the cartridge being claimed for use with an apparatus, or is a method of using the cartridge being claimed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7, 16-22 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hu et al.

There is disclosed in Hu a beverage preparation apparatus, comprising a collecting device 37 having a seat suitable to receive a disposable cartridge 10 containing a soluble product, the cartridge comprising an outlet opening for delivery of a

beverage, wherein the outlet opening is defined by at least one breaking line 21 present on a bottom wall of the cartridge, and wherein the collecting device comprises a piercing member 40 to pierce the cartridge at the breaking line and to completely engage the outlet opening formed, and comprising means (channels 42 and a peripheral gap formed between the opening and the piercing member) of regulating delivery of the beverage.

In regards to the delivery of the soluble product for at least seventy five percent of the total dispensing time, it is stated in Hu (col. 16, lines 29-30) that the number of channels can be adjusted accordingly. The number of channels, along with the gap formed between the opening and piercing member, is directly related to the percentage of product dispensed over the total dispensing time. It would have been obvious to one skilled in the art to adjust the number of channels and/or the gap between the opening and piercing member to provide the claimed results, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art.

Allowable Subject Matter

Claims 8-14 and 23-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Fond is cited for its disclosure of the state of the art.
